MIYAJIMA SATOSHI(54) POSITIVE PRESSURE TYPE ARTIFICIAL
RESPIRATION AID INSTRUMENT

(57) Abstract:

PROBLEM TO BE SOLVED: To provide a positive pressure type artificial respiration aid instrument by which a user being airway obstruction in expiration eliminates the airway obstruction and easily shifts to inspiration in a positive pressure breathing therapy.

SOLUTION: In the positive pressure type artificial respiration aid instrument provided with a positive pressure gas generation means for feeding positive pressure gas to the user, the control means of the positive pressure gas generation means for feeding the positive pressure gas of pressure in inspiration (IPAP) in inspiration and pressure in expiration (EPAP) lower

than that in expiration corresponding to breathe the user, a breathing interface for feeding the positive pressure gas to the user and a duct means for controlling the positive pressure gas generation means to the breathing interface, the control means control positive pressure gas generation means to lower pressure in expiration stepwise in the expiration of the user.
